Leroy Fan

A senior software engineer, web developer. I have 3+ years node, 3+ years react, 2 years java, 1 year Mysql, 2 years management with the 10-persons team and 1 year architecture design experience, be expert in solving the problems in the web application. And I love in vim & linux, to figure out the rule in the process and empower the process to make difference. I am very curious to find a different way to solve problem and wish there is a better way no one reached ever, to face the challenge and get something new.
